THE CHAPMANESE.

The new language for Antiquaries, Numismatists and Philologists, and its mysterious progenitors.

The Smithsonian Institute has sent forth many valuable publications diffusing knowledge in the interests of Science, but its founder never thought that long after his death, there would arise a pair of youths, whose combined learning would revolutionize that for which the savans of the ages have labored in vain to perfect. I refer to the numerous additions to the English language, the new styles of phraseology, orthography, etc. Much of which can be obtained gratuitously, but occasionally at 50 cents per volume, in the form of coin catalogues issued by the Chapmanese Bros., of Philadelphia.

These authors, the originators of the system, were evidently graduates of "*Harvard College, etc., New Haven*" (vide Bushnell, lot 368); what caused them to "*divert*" from this centre of learning and produce a style "*different to*" any others (Bush. 1265, 1317) must ever remain a mystery. Their historical ability is unsurpassed (in its way). Who but the Chapmanese could have discovered "*Charles I playing on a harp*," in 1681? (Bush. 918); this proves he wasn't beheaded in 1649, as vulgar history states. To show that the candidates for President and Vice-President, in 1861, were Lincoln and "*Hamilton*," you need but to refer to Bushnell, 1976, '82: or to learn that the Salem, Mass., Mechanics' Exhibition, was held in "*New Jersey*," look for lot 2117.

Variety is the spice of life, especially when "we" say "*sewn*" and "*sewen*" in lots 2273, '9, '82; but when you want a "*variety to last*" refer to lots 2633, '49, these are the coins to buy, they being of a lasting sort.

Discovery is one of the strong points with these Antickwaries; in lot 1763 may be read, "*We lately discovered* (the Birch Cent) exhibited *by* the U. S. Mint, at Philadelphia, to be an electrotpe copy"; it is to be regretted, however, that they did not discover the numerous electrotypes and castings offered and *guaranteed* as genuine, in the aforementioned Bushnell catalogue.

The next compendium of scientific knowledge known as the Warner catalogue treats of various peculiar articles, chief among which are the following: Lot 200 "*AVGVSTAE PACI*, is the *mong of Ephesus*"; although the majority of the people may never have known what a "mong" was; the publication of its Latin name may teach posterity the danger of having such reptiles around unchained. Lot 286 calls for a "*Denarii*"; lot 314 a "*Soldiers*"; while 735, 821 are christened "*Medalettes*." Even Dutch isn't beyond the Chapanese; lot 1515, voc is translated "*United East India Co.*"!; the term "*Gulden*" in the several following lots, is evidently a mule of the Austrian Gulden and the Dutch Guilder.

In lot 2628 "*Head of Liberty*" masquerades "*as an Indian Queen*", and in 2642 "*H. of Liberty and Indian*", is a novel mule. The notes after lots 2711, 2801, 3032, alone are worth the price of the catalogue. 3273 "*we believe these are that set*"; the following 3274, "*Liberty, draped with a chiton*"; was too much for the average mind, so obliged me to refer to an encyclopedia, which says it is "a genus of gastropodous molluscs, having a series of testaceous symmetrical pieces implanted in back part of the mouth" (Zell); this is a base slander on poor, defenceless Liberty's clothing.

Free-masonry is exposed in lot 3360 by a "*Member of the Order of St. Vincent de Paul with a child in his arms.*"

"Elephant's breath" as a name for a color, is entirely superseded by the Chapmanese shades, such as "purple steel"; "brown steel"; "red steel"; "sharp and beautiful steel"; "purple light olive"; "purple red", etc.; as colors for copper; "white bronze" (2293.)

The most recent Chapmanese discovery is published in their Dec. 15. '85 catalogue; 1860 Dime, with stars; of these I sold several in 1871, at which period these pseudo-discoverers must have been draped in their first knee-breeches, and from their present state of mental development, could barely distinguish a Dime from a fish-scale.

I have discoursed somewhat lengthly on the Chapmanese publications, in order to remove any impression from the minds of Numismatists, who, after reading the preface of my last catalogue, supposed the Chapmanese were included among "principal dealers" for whom I've compiled catalogues, and for which reason the Chapmanese refused to either distribute or return my catalogues. I had no intention of flattering them by any such assertion; as any reader of their fixed-price-auction-sale-catalogues, can readily see that they have no competitors in their original styles of composition, holding sales, or disposing of "original" 1804 Dollars. I have known these puerile parallelograms ever since they were office-boys for Mr. Haseltine, and endeavored to sell me stamps from their private collections at his store, before Mr. H. arrived in the morning; (the Quakers advice to his offspring, is suggested; "my son, get money—honestly if thee can, but get it.") And from their business or reputation since, I couldn't class the "firm" as "principal dealers"; but perhaps, should have said "principle" had they been included. Still there are parties in the business who are far worse than these poor little chaps, because they are better skilled in villainy, which time only, can add to their experience book.
